Let's Start!

Humans have caused harm to many species.

Learning Outcome

Describe ways of solving problems and getting things done in written and spoken situations and in work and social contexts.

Ask your partner:

- What endangered species are there in your country?
- Why is it important to save them?

Can Do Statements

- I can talk about things that are happening and things that have happened.
- I can talk about cause and effect, and hypothetical situations.
- I can describe environmental problems.

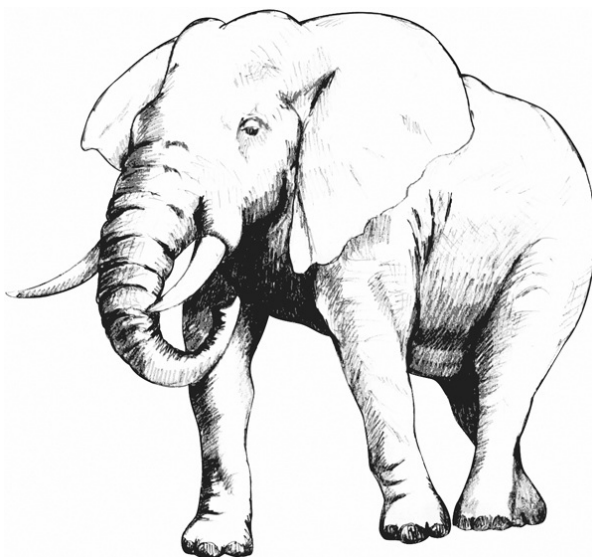

Let's Explore!

What has been the focus on **eco***-groups in the world?

* "Eco" is a prefix which represents ecology - the political movement that seeks to protect the environment, especially from pollution.

Instructions: Read the text aloud.

Across the world, species are disappearing at an astonishing rate. An increasing number of different genera of birds, fish, and land animals are being declared extinct every year. Making laws to protect these endangered animals has been the focus of many eco-groups. They work to keep the last remaining animals of a species alive.

Many species have been put in danger of extinction thanks to the activities of human beings. If humans had been more aware of wildlife preservation in the past, so many species wouldn't have become endangered. In many countries, endangered animals have been hunted for their valuable pelts, feathers, or meat. These products are being sold in markets around the world. So many of the animals have been killed that they are not able to reproduce quickly enough to continue the species.

Environmental groups around the world have made us more aware of our behavior. Immediate action has to be taken to protect the last population of many endangered species. Many countries have made laws to prohibit the hunting or killing of endangered animals. There are also laws against deforestation - the permanent destruction of forests. Unfortunately, not everyone is sympathetic to the cause. Many continue to destroy forests, pollute waters, and hunt wild animals for profit. These questions remain: If we lose more species, what will be the environmental cost? If we were to pollute and hunt less, would we see an immediate turn around? If we want answers to these questions, we must act, and act quickly.

Let's Practice!

It's nice to hypothesize ...

Instructions: Complete the text by choosing from the options you are given. Read the text (sentences) aloud. Check your pronunciation with your instructor.

- | | | |
|------------------------|-------------------------|------------------------|
| • had been more aware | • what are | • if we wanted answers |
| • has been more aware | • what will be | • we act |
| • were more aware | • what will | • we must have acted |
| • would have become | • if we had to pollute | • we must act |
| • become | • if we were to pollute | • would we seen |
| • wouldn't have become | • if we are to pollute | • if we want answer |
| • if we lost | • would we have seen | |
| • if we lose | • would we see | |
| • if we losing | • if we want answers | |

1. If humans _____ of wildlife preservation in the past, so many species _____ endangered.
2. _____ more species, _____ the environmental cost?
3. _____ and hunt less, _____ an immediate turnaround?
4. _____ to these questions, _____ and act quickly.

Let's Practice!

What is happening to the world's wildlife?

Instructions: Complete the sentences below with the options you are given.

Word Bank

are disappearing / have made laws / have been hunted / have been put in danger /
have made us more / has been taken

1. Across the world, species _____ at an astonishing rate.
2. Many species _____ of extinction thanks to human beings.
3. In many countries, endangered animals _____ for their valuable parts.
4. Environmental groups _____ aware of our behavior.
5. Immediate action _____ to protect the last population of many endangered species.
6. Many countries _____ to prohibit the killing of endangered animals.

Extension Activity

Research endangered species in your country.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online or visit the library to find out which species are endangered in your country.
- Prepare a report about the kind of animal, why it has become endangered and what can be done about it.
- Share your reports with a classmate/partner.
- Discuss the issue of endangered species in your country.

Self-Assessment

Yes **No**

I identify endangered species in my country.

☐ ☐

I write about environmental issues in my country.

☐ ☐

I discuss the issue of endangered species with a partner.

☐ ☐

Target Words

- **astonishing** (adjective): so surprising that it is difficult to believe, alarming
e.g. Species are disappearing at an astonishing rate.
- **genera** (noun): the general groups or classes that animals or plants are divided into
e.g. An increasing number of different genera of birds, fish, and land animals are being declared extinct every year.
- **to declare** (verb): to say, state, or announce that something is true
e.g. Scientists have had to declare the extinction of a number of species.
- **remaining** (adjective): left when others have gone, been used, or been dealt with
e.g. Eco-groups work to keep the last remaining animals of a species alive.
- **to reproduce** (verb): to produce new, young living beings
e.g. So many of the animals have been killed that they are not able to reproduce quickly enough.
- **pelt** (noun): the skin of a dead animal, especially with the fur or hair still on it
e.g. Endangered animals have been hunted for their valuable pelts, feathers, or meat.
- **deforestation** (noun): the cutting or burning down of all the trees in an area
e.g. There are also laws against deforestation.
- **sympathetic** (adjective): willing to give approval and support to an aim or plan
e.g. Not everyone is sympathetic to the cause.

Learning Points

The Passive: The Present Continuous and Present Perfect Tenses

You use the Present Continuous to talk about an action that is happening at the time of speaking. The action or event is in progress.

*Across the world, species **are disappearing** at an astonishing rate.*

You use the Present Perfect to talk about a finished action or event with present consequences. There is a connection between what happened in the past and the present.

*Making laws to protect these endangered animals **has been** the focus of many eco-groups.*

You often choose the passive form when you want to talk about an action but are not so interested in saying who or what does/did it. Passives without *agents* (the doers) are common in academic and scientific writing.

Look at the chart below for the structure of the passive voice.

Name	Structure	Example
Present Continuous	<i>am/are/is + being + past participle</i>	<i>These products are being sold in markets around the world.</i>
Present Perfect	<i>have/has + been + past participle</i>	<i>In many countries, endangered animals have been hunted for their valuable pelts, feathers, or meat.</i>

Examples:

- *Immediate action has been taken to protect the last population of many endangered species.*
- *Many countries have made laws to prohibit the hunting or killing of endangered animals.*
- *An increasing number of different genuses of birds, fish, and land animals are being declared extinct every year.*
- *These products are being sold in markets around the world.*
- *So many of the animals have been killed that they are not able to reproduce quickly enough to continue the species.*

Learning Points

Conditional Sentences

There are four types of conditional sentences in English:

1. Zero Conditional - to talk about certainty and facts
2. First Conditional - to talk about real possibilities in the present or the future
3. Second Conditional - to talk about things that are not possible or not likely to happen in the present or the future
4. Third Conditional - to talk about things that happened or did not happen in the past that you regret

You use the third conditional to talk about the past. These are things that were not real or did not happen in the past. You often use the third conditional to express regret.

Look at the chart below to compare the structure of each kind of conditional:

Conditional Name	Structure	Example
Zero	<i>If + Simple Present, Simple Present</i>	<i>If you heat ice, it melts.</i>
First	<i>If + Simple Present, will + Simple Present</i>	<i>If we lose more species, what will be the environmental cost?</i>
Second	<i>If + Simple Past, would + Simple Present</i>	<i>If we were to pollute and hunt less, would we see an immediate turn around?</i>
Third	<i>If + Past Perfect, would have + past participle</i>	<i>If humans had been more aware of wildlife preservation in the past, so many species wouldn't have become endangered.</i>
